

CONTAMINATION CONTROL FLOATING FLOOR MATS – DATA CENTRES

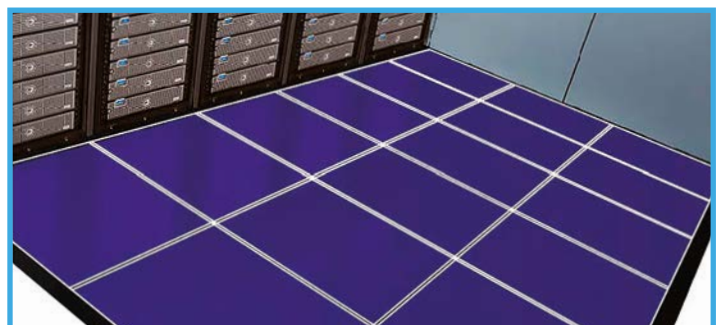

Data Centre industry research has concluded that up to 70% of computer-related breakdowns are caused by dust and other debris. If ignored, it can cause widespread damage in within Colocation and Sensitive Data Holding Environments.

Dycem Contamination Control Floating Floor Mats support the removal of contamination from Server Entry areas subject to ESD risk, preventing dust particles from disrupting Data Centre environments.

KEY BENEFITS

- Easy to use and easily **Self-Installed**
- Long lasting, Cost effective **Alternative to Peel-Off Mats**
- Compatible and compliant to **ASHRAE and ISO regulations**
- **Removeable and Repositionable** to fit into your deep cleaning routines

AREAS DYCEM FLOATING FLOOR MATS BENEFIT

- Entry and Exit to Server Rooms
- Rack Entry and Exit Zones
- Custom Corridor Entries
- Server Airlocks

EXAMPLE OF THE **FLOATING FLOOR MAT**

SIZE

Completely customisable allowing six footballs or three full wheel rotations to remove contamination

SUPPLENESS

Conforms to shoe and wheel profiles collecting and retaining particles between 1-100 microns

SMOOTHNESS

Polymeric surface creates natural tack and short-range electromagnetic forces (Van der Waals)

SILVER

Biomaster, a silver ion-based antimicrobial, proven to protect against 50+ organisms

STATIC DISSIPATIVE

Surface resistivity of 10 ohm protecting against Electrostatic Discharge (ESD)

SERVICE

Local customer support before, during and after you purchase
